Our Solutions

F+S

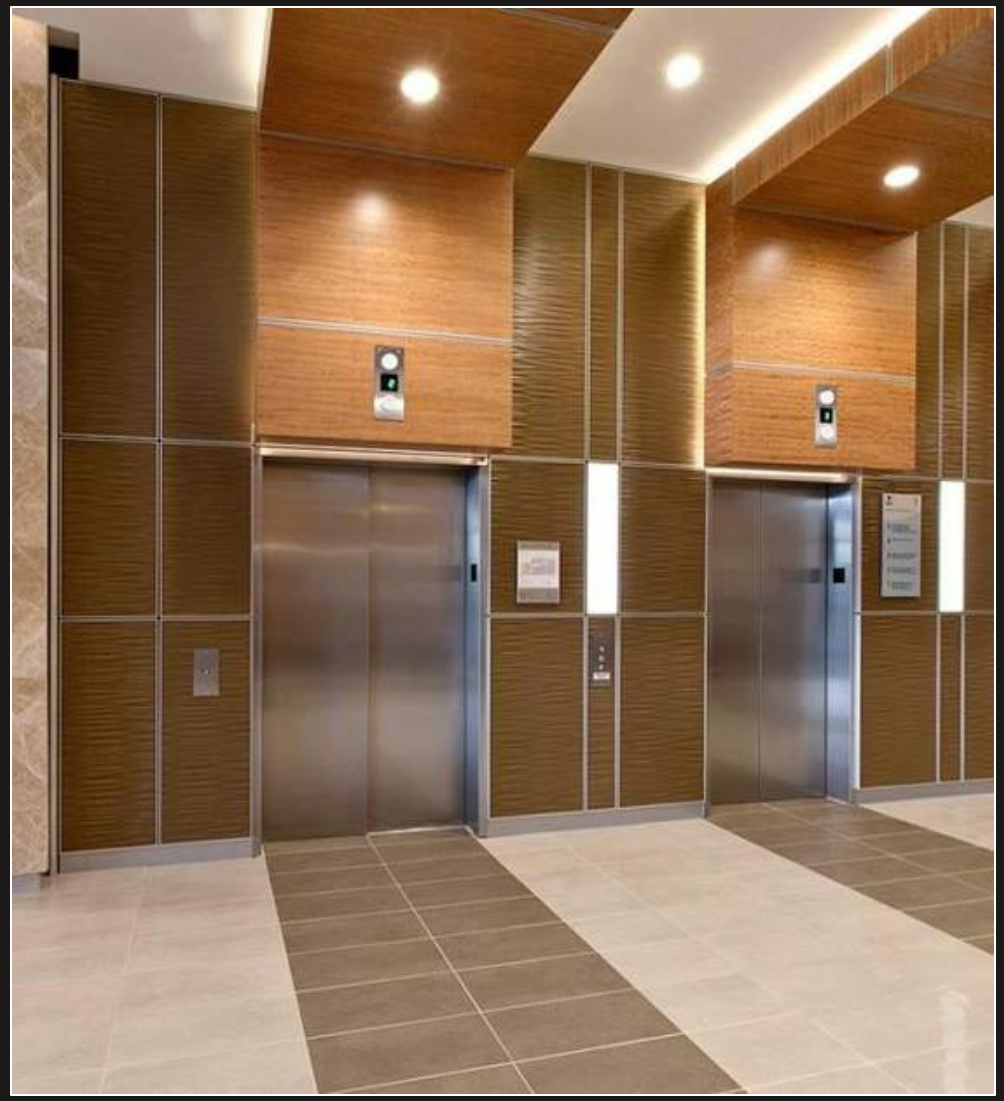

Bonded Metal is a high-performance surfacing material that offers a wealth of design possibilities.

- **Cast to Last**
- **Rich Metallic Colors**
- **Textural Patterns**
- **Contrast Enhancing Patinas**
- **Impressive Versatility**
- **Field-proven for more than 50 years**

VividGlass

F+S

Nearly indistinguishable from real stone, ViviStone glass unites the beauty of stone with the convenience of architectural glass. Ideal for any indoor or outdoor setting where visual richness is desired.

- **Comprised of a graphic interlayer between two transparent lites of glass or transparent lite of glass and reflective glass backer**
- **Numerous standard slab interlayer options**
- **Two finish options increase the visual possibilities**
- **Manufactured to specification; cut to size and ready to install**
- **Suitable for interior and exterior applications**
- **Highly configurable through the ViviStone Virtual Quarry**

ViviSpectra glass brings photos and other continuous tone images to indoors and out.

Spectra has four divisions

i. Spectrum uses imagery you supply;
ii. Zoom draws on our Zoom Digital Darkroom
iii. VEKTR lets you get creative with our VEKTR Digital Canvas.

- **Interlayers incorporate customer-supplied photos, digital files, and other continuous tone color imagery**
- **Manufactured to specification; cut to size and ready to install**
- **Suitable for interior and exterior applications**

ViviSpectra Zoom glass and the Zoom Digital Darkroom give you the tools you need to bring stunning high-resolution photography of nature and the world around us to large-scale glass applications.

- **Zoom interlayers incorporate Zoom images, our growing collection of large-scale, super-high-resolution photos available through our Zoom Digital Darkroom (ZDD).**
- **Creative Invitation**
- **Manufactured to specification; cut to size and ready to install.**
- **Suitable for interior and exterior applications**

Elevator Interiors

F+S

Elevator Interior

- Pre-Engineered system capability
- In-house finishes
- Globally accepted technical specifications
- Design, engineering and installation support
- Customized Interior/ Designs
- Provide End to End integrated solution
- Comply with applicable Global Safety Standards, Eg; Safety Glass, Emergency Exits in Ceiling, etc.
- Successful installations all over:
    1) India
    2) Asia Pacific
    3) Middle-East
    4) UK
    5) Australia

Wall Panel System

F+S

Wall Panel System

The Wall System unites high-performance materials, lightweight panels and numerous configuration options. Aluminum-framed panels with structural backing and decorative insets form the basis of the system

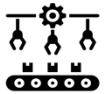

- Design, engineering and installation support
- Wide range of material, finish and pattern combinations from our extensive Surfaces palette
- System elements include corners, bases and mounting channels
- Comply with applicable Global Safety Standards, Globally accepted technical specifications.
- Successful installations all over:
  a) India
  b) Asia Pacific
  c) Middle-East
  d) UK
  e) Australia

Column System

Columns System offer exceptional flexibility for cladding existing structural columns. As versatile as they are beautiful, they suit a wide range of field conditions and can be adapted to site-specific needs and design themes

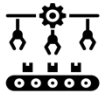

- Design, engineering and installation support
- System elements include aluminum-framed column panels, panel subsystem, bases, corners, reveals and installation hardware
- Wide range of material, finish and pattern combinations from our extensive surfaces palette
- Comply with applicable Global Safety Standards, Globally accepted technical specifications.
- Successful installations all over:

LightPlane Panels

F+S

LightPlane Panels

LightPlane Panels are engineered, edge-lit LED panels that allow you to seamlessly illuminate a wall, column, elevator interior, or standalone panel. This innovative product combines our cutting-edge lighting technology, our VividGlass laminated glass, and a highly engineered framing system to create an illuminated panel unlike any other.

- Design, engineering and installation support
- System elements include aluminum-framed lightplane panels, panel subsystem, bases, corners, reveals and installation hardware
- Wide range of material, finish and pattern combinations from our extensive surfaces palette
- Comply with applicable Global Safety Standards, Globally accepted technical specifications.
- Successful installations all over:
